Admission Essay

Molloy College has always been a dream of mine for its many qualities and factors. The past few years in high school have made me understand the importance of studying in institutions that truly care about their students and not just the numbers. Any other institution cannot replace the excellent teaching staff, the array of student societies, and the value for money. This college will help me achieve my childhood dreams and set me on the right path to kickstart my career. I hope my application will be given great consideration.

My past experiences throughout life have made me the perfect fit for the ideal student attending Molloy College. I have long focused on being a well-rounded student – this means that while studies were a high priority of mine, it was not the only priority of mine. I wish to gain real-life experience, work an actual job, and develop people skills through different student clubs.

My job at Popeyes has taught me a great deal about people, not only in terms of customers but also with colleagues and my boss. It was not easy to face people who were unsatisfied with my work quality, but I never lost patience and tried hard to learn from them and improve. Through hard work and determination, I became one of the most recognized employees at my level. The qualities that I developed at my job are irreplaceable life lessons – not only that, but I think these qualities are extremely important to carry me through my college life with difficult studies.

Student clubs have also been important to me during high school, and I hope to carry this forward at Molloy College. Social clubs have shaped me into the person I am today – I have made strong friendships with the people I have come across. I have also learned the importance of teamwork and compromise. Molloy College has over 60 student clubs for students like me to be attracted to. I hope to find a club or multiple clubs that are meant for me and to meet people like me. On the contrary, I am also looking forward to meeting people who *do not* think like me to challenge my truths and beliefs. I am excited to discover myself and others through the many clubs.

The skills, qualities, and knowledge I wish to gain in college can only be offered through Molloy College's rounded experience. Most of the teaching staff are permanent with doctoral degrees, but what attracts me the most is the student-professor ratio being 10:1 is one of the best in the country. At Molloy College, I think it will be easy for me to discover my true calling and find the perfect career path suited for me. The attention that the staff can provide each student is irreplaceable. My willingness to learn, determination, and resilience will carry me far at this college.

Molloy College seems to be the perfect college for me for more reasons than I can pen down. The incredible staff, the variety of student clubs, and even its campus life cannot be matched as it does not overflow with students. Moreover, my dream to become a leader in my career path can be met through Molloy College; the college is known for its graduation and employment rate. My wish to discover myself and build more meaningful bonds with others can be met through the student life experiences that Molloy College offers. Therefore, I am hopeful to be considered for Molloy College.
